Education

2021–2023 **Diploma in Computer Information Systems**.
Okanagan College

2023–2026 **Bachelor of Science in Computer Science**.
University of British Columbia

Related Work Experience

2023 **Programming Instructor**, The Cube School.

- Taught a class of international students introductory web programming (Python, HTML, CSS).
- Prepared lesson materials and explained concepts clearly to students with varying experience levels.

2023 **Web Developer (Contract)**, The Museum & Archives of Vernon.

- Developed a website to create and display "virtual exhibits" for the Vernon Museum. The project included administrative pages for staff members to create exhibits and guest pages to view them.
- Worked as part of a small team to develop the project, using Git and Jira to coordinate.
- Routinely met with the client to elicit requirements and feedback as the project progressed.

Personal Projects

Visit / Code / Report — **EDI** is a game-playing AI developed for The Game of Amazons. The program was initially designed to participate in a university computer Amazons tournament, which it won, but has since grown in scope to include a general library for creating Amazons programs and a command-line tool for assessing their performance.

Code — **Aperture** is a high-performance Optical Mark Recognition (OMR) program developed by myself and a team of 5 others. Aperture was originally developed as a proof-of-concept, and since then I have continued to independently maintain and improve its core web service.

Technical Skills

Languages: JavaScript, Go, C, Java, Python, HTML/CSS, SQL
Tools: Docker, Git, Postman/Bruno, Jira, GitHub Projects
